09.30-11.00	Economic Reform & Development	Education for Sustainable Development				 <p>Concept Summer Course 2006</p> <p>With its new learning approach, the Summer Course aims at introducing students from all over Egypt to the concept of sustainable development and its forms of application in Egypt.</p> <p>By introducing new teaching and educational methods based on adapting, reshaping and applying knowledge and through an inter-disciplinary training for students with different backgrounds, the Summer Course meets the requirements of the labour market and responds to Egypt's needs for creative and critical intellectuals who can represent their country within the increasingly international governance-framework.</p> <p>The four-week program will introduce the students among others to the following thematic fields:</p> <ul style="list-style-type: none"> • Economy: Markets and Societies • Education: Learning for Change • Environment: Natural Resource Management • Governance: Thinking globally, acting locally <p>While in the first week, state-of-the-art methods and learning techniques will be presented, the above mentioned themes will be tackled in detail during the second and third week. Using these techniques, the students will carry out small research tasks throughout the Summer School. During excursions in the second and the third week, ongoing projects will be visited to see the practical side of development and experience the reality of project work on site.</p> <p>During the fourth week, finally, the research projects will be finalized and presented at a public symposium.</p>
