Incubated by

In partnership with

Namaa Summer School on Sustainable Development 2007

With its new learning approach, the Summer School aims at introducing students from all over Egypt to the concept of Sustainable Development and its forms of application in Egypt.

By introducing new teaching and educational methods based on adapting, reshaping and applying knowledge and through an inter-disciplinary for student with different backgrounds. The summer School meets the needs of the labor market and responds for Egypt's need for creative and critical intellectuals who can represent their country within the increasingly international governance-framework.

The four-days program will introduce the students among others to the following thematic fields:

- Economic Development.
- Education and Alternative Education.
- Environment (Natural resources management).
- Good Governance and Participation.
